

3P Filter Collector

Item #2000820 Gray
Item #2000810 Brown

PRODUCT OVERVIEW

This has a open and closed position for collecting back pressure. The 3P Filter Collector filters and collects rainwater for water butts and rain tanks. It is made of high quality durable plastic. The Filter Collector leads clean water to the storage tank with high efficiency under normal rainfall (85 to 95%). The filter can act as the overflow outlet for the tank once filled. With 2 positions open or closed.

Food grade high quality polyethylene construction

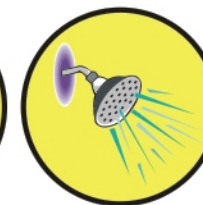

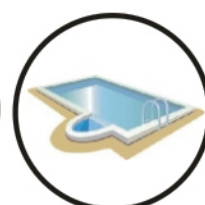

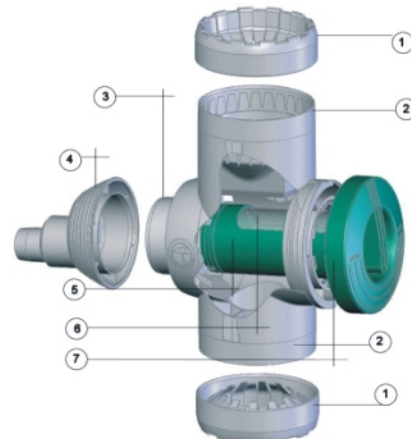

Accepts high volume of water flow

Low maintenance

High efficiency
